Education

University of Sheffield BSc (Hons) Computer Science (First)	2023 - 2026
The Sixth Form College Farnborough Computer Science (A), Mathematics (A), Physics (A)	2021 - 2023

Work Experience

Cyber Summer School, Civil Service - Completed a 10-week government-run cyber security programme that combined lectures, workshops, and structured projects designed to simulate real-world security challenges. - Gained extensive hands-on experience in areas such as penetration testing, malware analysis, ethical hacking, and digital forensics through practical labs and guided exercises.	Jun 2025 - Sep 2025
Officer Cadet, University Officers' Training Corps - Undertook a year of leadership and team training through military-style exercises. - Developed discipline, resilience, and working under pressure in challenging environments.	Oct 2024 - Sep 2025
Engineering You're Hired, University of Sheffield - Collaborated in a multidisciplinary team to plan a regenerative braking system for aircraft. - Awarded with a distinction after publicly presenting and coming first in student hub.	Feb 2025

Projects

Avis Drone Labs, University of Sheffield https://avisdronelabs.uk - Part of the core software team developing FGCS, a student-led, open-source ground control station for ArduPilot aircraft, focused on real-time telemetry, log analysis and mission planning. - Developed frontend (React + Electron) and backend (Python Flask) features, including a battery monitoring system, customisable altitude alerts, while modernising legacy code with Redux. - Additionally worked in a multidisciplinary team of 14 to produce a fixed-wing UAV featuring fully autonomous flight, aerial mapping, payload delivery and computer vision for object classification.	Sep 2024 - Present
Code Collaborate https://collaborate.bensgilbert.com - Deployed a real-time, browser-based coding platform with a room system, chat, and code execution, attracting 40+ monthly active users within four months. - Built the frontend with SvelteKit and Tailwind; deployed to Cloudflare using an automated CI/CD pipeline triggered by GitHub commits to main branch. - Developed the backend using FastAPI, facilitating real-time communication via WebSocket; containerised with Docker and reverse-proxied with NGINX on a VPS.	Jul 2022

Skills

Languages: Python, C#, Java, C++, HTML, CSS, JavaScript, TypeScript, Ruby, Haskell

Frameworks: React, Vue.js, SvelteKit, Flask, FastAPI, Socket.IO

Technologies: Docker, Git, GitHub, AWS (EC2, S3), GCP (OAuth2), Stripe, MySQL, PostgreSQL
